STEM MAJORS

STEM | Science | Technology | Engineering | Mathematics

STEM Majors are degree programs that provides students with the education and training they are required to serve in science, technology, engineering and innovation field. With these foundations, careers in science, technology and innovation allow students to become problem solvers, create new ideas, research and innovation. These professionals will be working in different places such as at offices, laboratories, research institutions, construction sites, factories, enterprises and more. The degree program is generally offered at the undergraduate level, but there are also master's and doctoral levels. STEM allow students to use reasoning and in-depth analysis skills to reach conclusions based on research data to solve real-life problems.
